

DecoScreen™ Decorative Metal Panels

Updated 11.13.23

## DecoScreen™ Decorative Metal Panels

### Description:

DecoScreen™ Decorative Metal Panel systems provide exclusive patterns that can be utilized in many ways. From equipment screen paneling to ornate facades, our laser-cut panels can add an intricate blend of artistry and refinement to any project. DecoScreen™ Panels come in several panel materials ranging from 1/8" – 1/4" to suit a wide range of applications.

### Materials:

- Aluminum
- Stainless Steel (Brushed or 2B)
- Corten Steel

### Sizes:

- 2'x4', 2'x8', 4'x4', 4'x8'
- Any custom size up to 4'x10'

### Thickness:

- 1/8"
- 3/16"
- 1/4"

### Finish Options:

- Powder coat finish conforming to AAMA 2605.

### Fasteners:

- Standard Attachment: Exposed fasteners, color matched to panel.
- Premium Attachment: Counter Sunk, color matched to panel.

### Aluminum Panel Information:

Aluminum is the most versatile material we offer. The lightweight nature of the material makes installation and transportation easy. When coated with one of our powder coat finishes, it ensures a maintenance-free, non-rusting finished product.

### Stainless Steel Panel Information:

Stainless steel is the perfect choice for indoor or outdoor applications when a raw metallic look is desired. While more expensive than our other material offerings, it provides a range of benefits including resistance to corrosion even when uncoated, easy maintenance and aesthetic appeal.

### Corten Panel Information:

Corten steel, also known as weathering steel, offers a unique combination of benefits for decorative metal paneling. It is highly resistant to corrosion, has a distinctive appearance with a natural, weathered look, is very durable and requires no maintenance. Corten is the perfect material for a rustic aesthetic in naturally corrosive locations. Recommended for applications that will not be affected by staining.
