Additional Colors and Custom Color Matching Service

This color chart showcases a selection of our most popular colors. However, we offer a wide variety of additional colors across the color spectrum, including textured and metallic options.

We also provide custom color matching.

Contact us for more information and additional color offerings!

Super Durable Polyester AAMA 2604

AAMA 2604 Super Durable Polyester Powder Coating is a high-performance coating that provides exceptional durability, color retention, and weather resistance for exterior applications. Ideal for architectural and industrial uses, it offers superior protection against fading, chalking, and corrosion.

Key Features:

Resists fading, chalking, and staining from UV exposure.

Performs well in extreme temperatures and harsh environmental conditions.

Excellent resistance to salt spray, humidity, and chemicals.

Maintains vibrant color over time, ideal for outdoor and indoor surfaces.

South Florida UV Resistance

Per AAMA 2604

Up to 10 years

Gloss retention: 30%+

Color Retention: $\Delta E < 5.0$

Warranty Information:

Warranty Duration: 10 years.

Coverage: Warranty covers peeling, cracking, or excessive fading of the coating.

For locations in close proximity to saltwater, warranty coverage may vary. See our warranty documentation for more information.

IFS Powder Coatings

Architectural Color Collection

IFS Coatings for Architectural Applications

IFS has a world class range of powder coatings designed to protect and decorate architectural metal to the very highest standards. Our architectural powder coatings are tough, weatherable, and meet and exceed each of the AAMA performance specifications, ensuring every level of exterior durability is available.

The Architectural Color Palette

The IFS Architectural Color Collection showcases just some of the colors available in the IFS range, from classic solid shades, to fine metallics and even anodic styles. We also understand that unique projects need unique colors. With that in mind, the free **IFS Color Matching Service** allows you to get the exact shade you are looking for in an environmentally responsible, durable coating. We will analyze the shade using the latest color matching technology and create a color for you to approve. What's more, you can also change the gloss, or add metallic/mica or textures to the product. Talk to your IFS architectural representative for more information on our exceptional color matching capabilities.

The IFS Architectural Color Matching Service

- Free custom color creation available
- Available in standard polyester, super durable and fluoropolymer technology
- Change the gloss, add metallics or textures
- Industry leading color matching times
- Sample panels available free of charge
- Small batches available, perfect for prototypes or one off pieces

With any coating, powder or liquid, there are some limitations on what is achievable at the higher levels of exterior durability. Quite simply, the pigments for some shades (for example, bright red) that will offer the durability required for these specifications, are not available. However there is a vast range of colors that are available, and will meet the exterior durability demands of the high level specifications. Similarly, not all gloss levels or metallic effects can be achieved at an AAMA 2605 level. Talk to your IFS architectural advisor for advice.

| AAMA Specification | AAMA 2603 | AAMA 2604 | AAMA 2605 |
|--------------------|--------------------|-------------------------|---|
| IFS Product | IFS 300SP | IFS 400SD | IFS 500FP |
| Product chemistry | Standard Polyester | Super Durable Polyester | 100% FEVE Fluoropolymer (70% PVDF liquid equivalent) |
| Warranty* | No warranty | 10 year warranty | 20 year warranty |

*Warranty supplied when applied by an IFS Registered Applicator to aluminum.

The IFS architectural range has been used on a vast array of architectural applications, from residential windows and doors, commercial store front and retail interiors, to curtain wall, louvers, scrims and screens on skyscrapers and monumental buildings.

The IFS Architectural Color Collection

IFS architectural coatings offer a combination of great aesthetics, toughness, durability, cost effectiveness and are the environmentally responsible choice. All of the colors shown on this card are available in AAMA 2603, 2604 and 2605 level products, so no matter what the project demands, we've got you covered. IFS 400SD, our super durable architectural product provides great exterior protection and improved color and gloss retention over a standard polyester product, while IFS 500FP, our world class 100% FEVE offers the ultimate in long term durability, color and gloss retention and scratch resistance. For more information on the strict performance tests that IFS 400SD and IFS 500FP meet and exceed, please talk to your IFS representative.

IFS 500FP codes start with an "F" and meet and exceed the performance requirements of AAMA 2605
IFS 400SD codes start with an "S" and meet and exceed the performance requirements of AAMA 2604
