

Perforated Panels

Perforated Panels are a popular choice for many projects, adding fantastic elements of texture and depth to cladding. Standard offerings listed below are available in perforated aluminum.

- Standard Perforation Patterns:
 - 10% Open area - 1/8" hole @ 3/8" stagger
 - 23% Open area - 1/8" hole @ 1/4" stagger
 - 40% Open area - 1/8" hole @ 3/16" stagger
- Ribbed and Flush panel profiles are available (see below)
- Material: 0.40 aluminum (other gauges available on request)
- Length: Up to 30'. Extra charges may apply for lengths shorter than 4'
- Attachment: Exposed fasteners
- Finish: PVDF (70% polyvinylidene)
- Colors: Choose from the Perforated Panel Color Chart
- Warranty: 20-year limited
- Installation: Orient vertically or horizontally

Additional hole patterns and panel profiles available, contact RoofScreen for more information.
